EXPERIENCE

Winner — Smart India Hackathon 2025 Full-Stack Developer [↗](#)

09-12-2025

Full-Stack Developer

Bilaspur

- Built a centralized platform for NDMA to monitor disaster training across India in real-time, helping the nation stay prepared for emergencies.
- Real-Time Monitoring: Integrated live tracking features to monitor trainee progress and resource availability, improving national disaster resilience.
- Impact: Awarded 1st Prize for creating a scalable solution that simplifies how the government manages and tracks disaster management drills.

Freelance Graphic Designer — Yazuka, Rahul Sir Classes [↗](#)

06-2025 - present

Graphic Designer

Bilaspur

- Visual Communication: Designed high-quality social media graphics, posters, and marketing materials tailored to each brand's identity.
- Client Management: Managed the full design process from initial concept to final delivery, meeting strict deadlines and client requirements.

PROJECTS

Project Task-Manager [↗](#) | [MongoDB](#), [Express](#), [React](#), [Node.js](#)

06 2025

- Task Management: Built a real-time tracking system to assign tasks, set deadlines, and monitor project milestones, improving team productivity and accountability.
- Authentication Security: Added secure Login and Signup using JWT and Bcrypt to protect user accounts and data.
- Role-Based Access Control: Created Admin and Member roles; Admins can manage everything, while Members can only update their assigned tasks.
- Backend: Used Node.js and MongoDB to manage and store all project information efficiently.
